- 99 item accumulation memory
- Covered by 1 year warranty

### What is the JCA?

The Jadever JCA is a Class III Approved parts counting scale with a water resistant keypad and an optional second scale input with the ability to send data to a PC.

This counting scale is the ideal weighing solution to speed up the counting process, with a 50 item ID memory, 99 item accumulation memory and a hi/lo alarm to signal when you are near target.

### Trade Approved weighing

The JCA is a Trade Approved scale, ensuring it is legal for use when price is based on weight. If a customer is being charged by weight, it must be trade approved.

Trading Standards will check your scales are Trade Approved during routine visits, so investing in Trade Approved scales can help to prevent heavy fines if you are exchanging money due to a given weight.

### Choice of capacities

The JCA has a choice of capacities and graduations available to meet your needs. Capacities range from 3kg to 30kg and graduations from 1g.

The Tare function means that any unwanted weight, such as the weight of a container holding parts, can be quickly and easily removed for a highly accurate counting reading.
