Designed for ease of use

The M-910 is a bed weighing platform scale. Built to ensure that it is easy for medical professionals to safely and accurately obtain a weight for their patients.

This scale features from Tare function which enables staff to remove the weight of the bed or trolley, to ensure that they are left with an accurate weight for their patient, without having to calculate the difference.

Optional connectivity options

The M-910 is available with either Bluetooth or Wi-Fi connectivity to ensure that our customers are able to transfer data seamlessly or input into EPR systems.

We would simply need to insert a connectivity module at the time of order and then provide you with our standard protocols for easy and simple integration into your existing system.

Easy to use

The M-910 features from our best-selling DP-3810 indicator. This device features from a full numeric keypad for easy BMI calculation and simple function keys.

The On/Off button ensures that you have full control over the device and you can prolong the battery life. Hold enables you to gain readings for unsteady patients and Tare allows you to deduct unwanted weight.
