- Capacity: 1000kg / 3000kg / 5000kg
- Graduations: 0.5kg / 1kg / 2kg
- Aluminium die cast case
- Clear LED display
- Stainless steel shackle and hook
- Zero mode
- Tare function
- Hold mode
- Overload alarm
- 1 year Marsden warranty

What is the OCS-X?

The OCS-X is an accurate, durable and simple solution for suspension weighing. Crane scales are ideal for weighing goods to ensure vehicles are not overloaded.

Constructed from aluminium the Marsden OCS-X is hard-wearing, reliable and built to last. It has a choice of capacities and graduations available and can be operated from a distance.

Heavy duty construction

The OCS-X is a highly robust and accurate weighing scale. A fixed shackle and hook are constructed from stainless steel to provide the scale with strength and durability.

To help maintain the scales accuracy and inner mechanisms the OCS-X is fitted with an overload protection alarm, which will sound when the scale is near maximum capacity.

Large, bright display

The OCS-X has a large, bright red LED display which makes the weight reading easy to see from various distances in different environments.

As standard, an infrared remote is sold with the OCS-X, which means that the scale can be left in one fixed position and the user can safely operate the scale without having to move or dismantle the crane scale.
