- Bright LED display visible in most conditions
- Low profile forks
- Zero, Tare and Pre-set Tare functions for easier weighing
- 70 hours of continuous use
- Dimensions to fit euro pallet
- Four heavy duty load cells
- Overload Protection

Print your information

The built-in printer on the PT-200 allows you to print gross weight, net weight and tare weight, as well as count information when the scale is in counting mode.

Select the accumulation function and you can print the total weight of a number of pallets, too - helping you to avoid overloading of lorries and giving you the ability to obtain accurate weights.

Long-life battery

In addition to the mains adaptor, the PT-200 also has an internal rechargeable battery, which lasts up to 40 hours, giving you a full week of charge.

It can last even longer, thanks to the programmable auto power-off and indicator screensaver to save even more battery life between charges, enabling the device to turn off after standing idle for 10 minutes.

Overload protection

The PT-200 is packed with easy to use features making weighing even easier for all factory and warehouse staff when manoeuvring goods.

Tare will remove the weight of the pallet from the reading. Hold will stabilise the weight reading. A simple counting function allows you to add up items on a pallet quickly and easily.

Capacity:	2000kg	Power Supply:	Mains/Rechargeable
Graduations:	500g	Battery Life:	40 hours of continuous use
Functions:	Zero, Tare, Pre-Set Tare, Portable	Approvals:	Non-Approved
Dimensions:	1570mm x 545mm x 730mm	Optional Extras:	Print Roll
Weight of Scale:	125kg	Warranty Period:	1 Year
