What is the V-22?

The V-22 is a premium veterinary scale with a removable tray which can be used as a stretcher. It's suitable for weighing domestic pets in vet surgeries and at home.

It can accommodate small animals, such as cats and dogs, providing weight readings to an accuracy of 5g and with a capacity of 20kg. Highly popular due to the small and compact size of the scale.

Easy to clean

In order to help make the V-22 incredibly diverse and suitable for veterinary surgeries, we have designed the product to be wiped down.

Even though the device does not hold an IP rating, the platter can be wiped down without causing damage to the scale. Making it a clean and hygienic addition to any surgery.

Lightweight and portable

The V-22 has been designed with the ease of the user in mind. Whether it be within a veterinary surgery or at home, this is the ideal scale.

Weighing only 2.5kg, the scale is easy to transport around the veterinary surgery, from room to room. Or when used at home it is slimline enough to be stored in small and compact spaces.
